Topics

Health Aura

- As per current situation(i.e covid-19 era), wandering around in medical facilities can be harmful, So our web app will help the user to get proper information regarding hospitals, doctors along with the help of call support.
- Users can get all the information in just one click without any hindering.
- People can get appointments and be in touch with doctors with a single click through the web app

How health aura works

- **We have implemented three types of search and filtering functionality**
  - **Search by hospital name**
  - **Search by user location (using GPS)**
  - **Search by city and treatment**

How health aura works

- **Hospitals and Doctors listing**
  - We will list hospitals and doctors from various cities.
  - We have created admin dashboard for admins for adding hospitals and doctors

- **Complete user authentication**
  - We have created highly secured user signin and signup functionality using hashing techniques.

Job Portal

- **In this project we have implemented two types of Sign Up process**
  - **User Sign Up**
  - **Company Sign Up**

- **User signup**
  - **Check available jobs**
  - **Apply for suitable job**

Job Portal

- **Company signup**
  - ○ **Can add single company.**
  - ○ **Will get separate dashboard**
  - ○ **Can add multiple job opportunities**
